

EE80 Series

HVAC Room Transmitter for CO₂, Relative Humidity and Temperature

The EE80 series combines CO₂, relative humidity (RH) and temperature (T) measurement in one housing. The snap-in mounting concept stands for easy installation and replacement within seconds.

EE80 series set new standards in CO₂ measurements for HVAC. The operation is based on the infrared principle. A patented auto-calibration procedure compensates for the aging of the infrared source and ensures outstanding long term stability.

The basic EE80 version for CO₂ and T can be easily extended with a RH plug-in module. The well proven E+E sensor technology guarantees accurate and long term stability.

EE80 provides analogue 0 - 10V voltage outputs.

The optional display indicates sequentially the actual measuring data.
